To Our Valued Clients:

OASYS has been busy creating further Enhancements for your System!

Some of our Clients are now making their Reporting Options more Efficient by Publishing Selected Reports Directly to Excel, using Predefined Excel Templates. Not via Text Files or CSV Files, but **Directly To Excel!**

This has been achieved by implementing Industry Standard DDE (Dynamic Data Exchange) between OASYS and Excel.

Text Files and CSV Files have their place, but with Recurring Reports, up until now, you have had to Export the Data from OASYS, Import the Data into Excel, then Format the Cells, and redo this each and every time.

Now you will be able to Instantly and Seamlessly Convert any Report to Excel, with **No Exporting, No Importing, and No Formatting required on your part** – the Format will be **Custom Fitted to YOUR Reports**. You can Examine, Print, Save and/or Email your Report in Excel, with ease.

Prime candidates for this feature would be the **A/R Trial Balance** and **G/L Trial Balance**, but of course it would be up to you to select which Reports you would most wish to have this Option utilized with. If you desire, you could start off with one or two of your Reports and decide on more Reports later – you will receive the Same Value for the Same Price, whether you order one or more Reports at once, as they are Created Individually. We will simply set up the Excel Template, and then adapt your OASYS Report to Publish Directly to Excel.

On average, the time required to provide this will be 3 to 4 hours per Report, but this may vary, depending on the simplicity/complexity of the Report.

If you would like to receive Further Information about this Easy-To-Use Feature, please do not hesitate to contact us at your convenience.
